

THE CAY RESEARCH TOPICS

HURRICANES

What is a hurricane?

What are the categories?

What are its causes?

How can one protect oneself from a hurricane?

Create a 5-category database. What conclusions can you make based on the information you find? (You will be given instructions for the database.)

CORAL REEFS

How is a coral reef formed?

How are cays/keys related to coral reefs?

What are the inhabitants of coral reefs?

Research where most coral reefs are located.

MALARIA

What are the causes, symptoms, and cures?

How can one prevent or become immune to it?

Where is it most found and what is its rate of occurrence?

Research the number of fatalities in the world due to malaria.

SHARKS

What types are there and where can they be found?

Which types can be found in the Caribbean Sea?

Describe their feeding habits, habitats, and attacks.

Research the fatalities from shark attacks in the world.

WW II GERMAN AND AMERICAN SUBMARINES

Describe the interior and exterior of a U-boat and a U.S.sub.

How large, fast, and dangerous were they?

What was it like to live and fight on one?

Research Caribbean battles involving either type.
