

February 24, 2011

Dear Parents of 6th graders:

Last year, the Ohio State Law changed the immunization requirements for students entering 7th grade.

A booster immunization of Tdap (Tetanus, Diphtheria and Pertussis) is required. This is a new vaccine for persons over age 11 to adult. If your student has received a Td (Tetanus/Diphtheria) booster since their initial Kindergarten series, this may also be acceptable.

Please contact your doctor as soon as possible to complete this requirement or call the Price Hill Clinic (357-2700) to get information about their free/low cost immunizations. When your child has had their booster, please have the doctor's office complete the bottom portion of this letter with an immunization print out, and return it to the school office. It may also be faxed to 471-4530. If your doctor charges a fee to complete this immunization form, please call me before you pay the money.

Thank you for your attention to this matter prior to the new school year. Please call me at 471-4530 ext 119 (Tuesdays) if you need more information.

Sincerely,

Katherine Delk-Calkins, RN/MS
School Nurse

_____ received a Tdap/Td (please circle one) booster for
(Student's Name)

2011-2012 school entry on _____.
